## NeoColab\_REC\_CS23221\_Python Programming

REC\_Python\_Week 3\_MCQ

Attempt : 1 Total Mark : 25 Marks Obtained : 0

Section 1: MCQ

1. What is the output of the following code?

my\_list = [3, 6, 1, 2, 5, 4] print(sorted(my\_list) == my\_list.sort())

Answer

True

Status: Wrong Marks: 0/1

2. Suppose list1 is [4, 2, 2, 4, 5, 2, 1, 0], Which of the following is the correct syntax for slicing operation?

Answer

Status: Skipped Marks: 0/1

|     | 3. What will be the output of the following code?                    |                    |             |
|-----|--|--------------------|-------------|
| 241 | my_list = [1, 2, 2, 3]<br>print(my_list.count(2))                    | code?              | 24/50/1     |
|     | Answer   |                    |             |
|     | -  |                    |             |
|     | Status: -  |                    | Marks : 0/1 |
|     | 4. What is the output of the following Pyth                          | non code?          |             |
| 241 | word = "programming"<br>answer = word.index("gram")<br>print(answer) | 24,150,1001        | 24150100    |
|     | Answer   |                    |             |
|     | Chahua   |                    | Marka : 0/1 |
|     | Status: -  |                    | Marks : 0/1 |
|     | 5. Which method is used to add multiple in                           | tems to the end of | a list?     |
|     | Answer   | 007                | CO.         |
| 241 | -1001<br>Status: -   | 24,150,10          | Marks : 0/1 |
|     | 6. What does the append() method do in F                             | Python?            |             |
|     | Answer   |                    |             |
|     | -  |                    |             |
|     | Status: -  |                    | Marks : 0/1 |
|     | 7. What does the following code output?                              | 241501001          | 20100       |
| 24  | lst = [10, 20, 30, 40, 50]   | 2475               | 24/20       |
|     | w  | <b>▼</b>           | <b>▼</b>    |

```
print(lst[-4:-1])
Answer
                                                                      Marks: 0/1
    Status: -
    8. What is the output of the following code?
    my_list = [1, 2, 3]
    my_list *= 2
    print(len(my_list))
    Answer
    Status: -
                                                                      Marks: 0/1
    9. What is the output of the following Python code?
    string1 = "Hello"
    string2 = "World"
    result = string1 + string2
    print(result)
    Answer
                                                                      Marks : 0/1
    Status: -
    10. What will be the output of the following code?
    numbers = [1, 2, 3, 4, 5]
    numbers.remove(6)
    print(numbers)
                                                  241501001
    Answer
```

Marks: 0,

Status: -

11. What is the output of the following Python code? text = "Python" result = text.center(10, "\*") print(result) **Answer** Marks: 0/1 Status: -12. What is the result of the slicing operation lst[-5:-2] on the list lst = [1, 2, 3, 4, 5, 6]? Answer Marks: 0/1 Status: -13. What is the output of the following Python code? a = "Hello" b = "World" c = a + "" + bprint(c) Answer Marks: 0/1 Status: -14. What is the output of the following Python code? word = "Python" result = word[::-1] print(result) **Answer**
